CLEANUP KOREA 2019

December 5 (Thu) ~ 6 (Fri), 2019
EL Tower • Seoul, Korea

Organized by

Ministry of Environment

KEITI

Korea Environmental
Industry & Technology Institute

KOSSGE

Korean Society of Soil and
Groundwater Environment

Co-Organized by

Invitation

CRC CARE leads international CleanUp Conference series that provide a global forum to discuss all aspects of contaminated site assessment, management and remediation. The Organising Committee is preparing outstanding scientific and educational programs across the suite of conferences. The program blends research and industry best practice, drawing on experience from Australian and international markets.

With an expected attendance of over 1,000 delegates across all related fields and industries, the conference presents an excellent opportunity to share expertise and make connections before, during and after the event. The CleanUp Conference can help you to:

- increase awareness of your organisation;
- demonstrate your involvement in the contamination assessment and remediation industry;
- promote your products and services;
- support your brand; and
- build your profile.

Seoul is the capital and largest metropolitan city in Korea. It is located on the Han River which penetrates the whole city. In 2017, the city was ranked 4th in sustainable cities mobility index. Seoul is surrounded by mountains in all directions, and the capital area holds five UNESCO World Heritage Sites.

The Organising Committee is pleased to have secured the Hotel in Seoul as the host venue for the event. The conference venue offers an environment that enables attendees to easily navigate the tightly paced program, engage with exhibitors, and share ideas and information.

Conference Chairs

Prof. Seong-Taek YUN
 Prof. Kyoungphile NAM
 Prof. Kitae BAEK
 Prof. Yong Sik OK
 Prof. Ravi NAIDU

Call for Abstracts

The Organising Committee welcomes your submission of abstracts for CleanUp Korea 2019 in Seoul, Korea. All accepted abstracts will be presented in the "Oral Presentation Sessions" and/or "Poster Session" during the conference.

Also, all papers accepted for presentation at the conference will be considered for a Special Issue of the "Critical Reviews in Environmental Science and Technology (#2/117 in Environmental Engineering)".
